

TOPU RAYHAN

Full Stack Developer

Dinajpur, Bangladesh | topurayhantipu@gmail.com | +880 1744-406554

[GitHub](#) | [LinkedIn](#) | [Portfolio](#)

CAREER OBJECTIVE

Results-driven Full Stack Developer experienced in architecting scalable web applications. Expert in React, Next.js, and Node.js/Express.js. Proven track record in RESTful API design, MongoDB optimization, and secure JWT authentication. Committed to engineering maintainable code to enhance user experience and drive business efficiency.

TECHNICAL SKILLS

Expertise: JavaScript (ES6+), React.js, Node.js, Express.js, MongoDB, REST APIs, Firebase, Tailwind CSS, HTML5.

Next.js: Proficient in File-based Routing, Server Components, and SSR/SSG fundamentals.

Comfortable: REST API Integration, Server-side Development, JWT Authentication, Chrome DevTools.

Security & Authentication: **Role-Based Access Control**, JWT, Firebase Authentication, Middleware Implementation.

Familiar: Next.js, Axios, Mongoose, Cloud Deployment (Vercel / Netlify), TanStack Query, React Context API.

Tools: Git & GitHub, VS Code, npm, Postman / Thunder Client, MongoDB Compass / Atlas.

Soft Skills: Team Leadership, Communication, Time Management, Adaptability.

COMPETITIVE PROGRAMMING & PROBLEM SOLVING

Platform Profiles:

[CodeChef](#) | [Codeforces](#) | [LeetCode](#)

Problem Solving Impact: Solved 1,000+ problems demonstrating strong analytical and algorithmic thinking.

Core Fundamentals: Deep understanding of **Data Structures & Algorithms (DSA)** using **C/C++**.

Algorithmic Expertise: Expert in **DP, Graphs, and Greedy algorithms** for optimized computational problem-solving.

PROJECTS

Garments Production Tracker | Full Stack Developer

[Live](#) | [Client](#) | [Server](#) | (Feb 2026)

A comprehensive manufacturing management system designed to digitize the garment production workflow. It provides real-time visibility into the order lifecycle, from initial placement to final delivery, through role-specific interfaces.

Key Technical Implementations:

- **Role-Based Access Control (RBAC):** Implemented a secure authentication layer for Admin, Manager, and Buyer roles, ensuring distinct permissions and data privacy.
- **Dynamic Order Tracking:** Developed a 9-stage production lifecycle (Pending to Delivered) with real-time status updates and automated progress tracking.
- **Advanced Data Visualization:** Integrated interactive dashboards for each role, providing live production metrics, order statistics, and revenue analytics.
- **Performance Optimization:** Leveraged **TanStack Query** for smart caching and optimistic UI updates, significantly reducing server load and improving user experience.
- **Enterprise-Grade Security:** Utilized **Firebase Auth** and **JWT** for robust identity management and secure communication between the client and RESTful API endpoints.

Tech Stack: React.js, Tailwind CSS v4, Framer Motion, Node.js, Express.js, MongoDB, TanStack Query, Firebase Auth.

KaajKhojo - Bangladesh's #1 Job Portal | Full Stack Developer

[Live](#) | [Client](#) | [Server](#) | (March 2026)

A full-stack job portal built for Bangladesh, connecting job seekers with verified employers through an AI-powered platform with real-time application tracking and role-specific dashboards.

Key Technical Implementations:

- **AI-Powered CV Analysis:** Integrated Groq SDK (LLaMA 3.3) with pdf-parse to deliver instant, actionable resume feedback for job seekers.
- **Role-Based Access Control (RBAC):** Built a secure three-tier auth system (Seeker, Employer, Admin) using Firebase Auth and JWT with HTTP-only cookies.
- **Real-Time Application Tracking:** Engineered an end-to-end pipeline from job discovery to employer review with live status updates on personalized dashboards.
- **Advanced Data Dashboards:** Developed role-specific analytics panels with live job metrics, applicant stats, and admin content moderation tools.
- **Performance Optimization:** Centralized API calls via Axios with optimistic UI patterns to reduce server load and improve responsiveness.

Tech Stack: React 18, Tailwind CSS, Framer Motion, Node.js, Express.js, MongoDB, Firebase Auth, Groq (LLaMA)
